

WHY MAGNETIC DRUMS MB FROM SOLLAU?

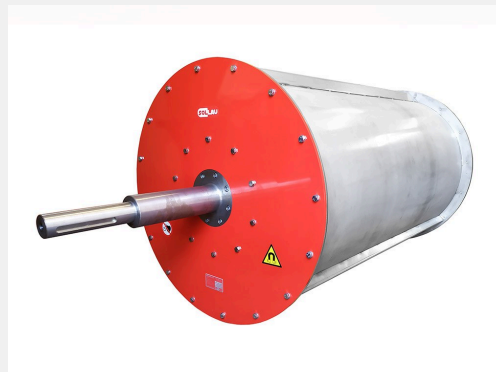

**INNOVATION
IN ACTION**

MB magnetic drums from **SOLLAU** are fitted with permanent **ferrite or neodymium** magnets and automatically separate ferrous particles from bulk materials – **without interrupting the material flow**.

6 diameters from Ø 154 mm to Ø 609 mm, capacity **15–220 m³/h**. For every diameter we publish the induction on both the core and the shell – **you know how many gauss you actually get**; every unit is supplied with a test protocol.

Small diameters Ø 154 and 204 mm for secondary sorting lines and smaller RDF producers. For abrasive materials, optionally a **manganese steel shell with replaceable covers**.

We give a 5-year guarantee on the magnetic core of MB drums!

GUARANTEE

5 years
on the magnetic core

DELIVERY

7–8 weeks

CAPACITY

15–220 m³/h

MANUFACTURING

built to order
in your brand

SEPARATOR PERFORMANCE

- Published induction on the core and shell for all 6 diameters: ferrite 1,600–2,800 G on the core, neodymium 5,200–6,000 G on the core / 3,300–3,800 G on the shell
- Test protocol for every unit built

TECHNOLOGICAL INNOVATIONS

- Replaceable drum cover shell – the solution for highly abrasive materials
- Optional manganese steel shell with covers you can replace yourselves

MANUFACTURING

- Standard diameters 154–609 mm, but we also build other sizes
- Stand-alone magnetic drum, or drum in a housing (MBZ series)
- In-house production in the Czech Republic, finished in your brand

MATERIAL TESTING

- Free test of your material with results within 3 days

STOCK

- Basic model in stock – immediate delivery

HOW WILL WE LOOK AFTER YOU?

1. We visit your
site

2. We measure up
and design

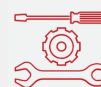

3. We build to
order

4. We install

5. We commission
and train

6. We provide
authorised
service
